

Temat: **The lightening systems – revision.**

Systemy oświetleniowe – powtórzenie materiału.

Cel lekcji:

Powtórzenie materiału z działu: Systemy oświetleniowe.

1) Welcome to the English class.

Moi drodzy. Dzisiejsze zajęcia poświęcimy na powtórzenie materiału z zajęć online.

Poniżej znajdziecie zdania ze słownictwem do powtórki. Przejrzyjcie je raz jeszcze i zwróćcie szczególną uwagę na słownictwo związane z tematem naszych zajęć.

- Visual inspection is performed to check the condition of an electrical wiring system.
- You should pay attention to the kind of wires you select.
- During the inspection of the wiring, the electrician checks the type of shock and fire protection measures used.
- The insulation connectors should be correctly selected for the system.
- Always check that the wire connections are correct.
- Electrical wiring checks must be carried out by authorised specialists.
- The manufacturer's instructions allow you to check whether the wiring has been correctly installed.

- Before (**replace**) a light bulb, the electrician has to disconnect the circuit from the power source.
- The residual-current circuit breakers (**turn off**) the circuit when it goes to ground.
- When new lighting was (**install**) in the classrooms, the switches were also replaced.
- The system worked normally, even after (**disconnect**) the power supply from the circuit.
- Three-core conductors are (**feed**) into the sockets.
- The electrical measurements are (**performance**) by qualified specialists.
- The (**electric**) took the necessary work tools with him.
- The lighting power-leads should have a protective Wiring that has been incorrectly installed poses a danger to its users.

2) Wasze dzisiejsze zadanie to powtórzenie słownictwa. Za tydzień, w piątek 15 maja, napiszemy test ze słówek. Będzie on oparty na materiale z dzisiejszej powtórki oraz zadaniach z lekcji online. Wystarczy dokładnie przejrzeć ćwiczenia z lekcji.

Have a nice weekend!

Pozdrawiam, Joanna Nowakowska
